

For Immediate Release

A Stroll Down Memory Lane

East Haven, CT, December 9, 2015 – As 2016 quickly approaches, we would like to thank our clients and partners for another successful year. We would like to take this time to recap some of the major events that were important to both Specialized Data Systems and our clients before the year comes to a close.

In the beginning of 2015, we introduced our new Risk Management Suite known as RemoteComply. We rebranded our established business continuity planning software and developed two new products including vendor management software and alert notification software. We plan to implement the last product by the end of the first quarter of 2016. The four integrated products within RemoteComply allow for complete preparation and maintenance for risk management.

As of May 2015, Specialized Data Systems is officially a registered member of the American Bankers Association (ABA). The American Bankers Association is the voice of the nation's \$15 trillion banking industry, which is composed of small, regional and large banks. As a Service Provider member of the ABA, we have access to a broad array of information, training, staff expertise and resources. We will be utilizing this information to gain further insight on the CFPB Integrated Disclosures & Uniform Closing Dataset (UCD) requirements and other lending, risk management and compliance related topics.

The TRID rollout in October 2015 was the month full of headaches, confusion and frustration. While we are happy to be past the initial rollout, we are even happier to express how successful our team and software has implemented the regulation. With the cooperation of our clients and devotion of our team, our loan origination software is fully compliant with TRID.

At the end of 2015, we received two awards; Tech Company to Watch by the CT Technology Council and Best in Technology bronze award by Bankers & Tradesman. It is our sixth consecutive year being named Tech Company to Watch and third consecutive year receiving the award for Best in Technology. We are proud to receive these awards and we will continue striving for award winning products and services.

With this rewarding year under our belt, we are excited to see what lies ahead for 2016. On January 15th President Marc Riccio will be speaking at the New England Mortgage Expo at Mohegan Sun. Later in the year we also look forward to the introduction of our new incident response software, our tradeshow schedule, our new training room in the East Haven headquarters, and our continued efforts to comply with the CFPB regulations.

As we continue to grow and expand our products and services, Specialized Data Systems would like to thank you for your continued support and business. We are here to support your current and future lending and risk management needs. Have a wonderful and peaceful holiday season.

Best regards

Specialized Data Systems
