

Remote PLAN

RemotePlan® Business Continuity Planning Software

Without an enterprise-wide BCP that considers all critical elements of the entire business, an institution may not be able to resume customer service at an acceptable level.

Federal Financial Institutions Examination Council, March 2008.

In light of regulations mandated by the Federal Financial Institutions Examination Council (FFIEC) as of March 2008, bank auditors are now encouraging financial institutions to deploy an automated **B**usiness **C**ontinuity **P**lan (BCP) software tool. If an event were to occur, automating your BCP will help maintain continuity of your business practices. The major benefits of implementing an automated BCP software tool include the ability to:

1. Create and maintain the plan from one centralized location
2. Update the plan in a timely manner to reflect the most current information
3. Distribute the plan quickly and easily to all relevant stakeholders

The Challenge

Due to the newly enacted Dodd-Frank Act, financial institutions are now being scrutinized more than ever before. Financial institutions are challenged with developing and maintaining an extensive and all encompassing BCP which addresses all corporate wide resources, such as employees, departments, locations, vendors, processes, etc. In order to react to an event (i.e. disaster or incident) effectively, your BCP should reflect the interdependency of these resources.

The Solution

Implementing a software solution will allow you to maintain all of the parameters of your business continuity plan. Specialized Data Systems is well-positioned to provide this solution through our BCP software known as **RemotePlan®**.

RemotePlan® Business Continuity Planning Software

RemotePlan® is an integrated platform that addresses all facets of the Business Continuity Planning process including Business Impact Analysis, Risk Assessment, Risk Management and Risk Monitoring and Testing. RemotePlan provides a “blue-print” methodology for banks and credit unions to follow that ensures the development of a complete and sufficient recovery program. This “blue print” methodology will allow your organization to map out the critical activities that must be completed and the necessary resources required to complete these activities.

RemotePlan delivers quality functionality within the budget and regulatory guidelines of banks and credit unions which consist of:

- Complete BCP Solution
- Web-based Application
- Scalability
- Comprehensive Reporting
- Audit Trailing
- Easy to Use System
- Interactive Planning
- Remote Document Repository
- Secure Application within the Hosted Environment
