Remote
COMPLY®
Risk Management Suite

Organizations are faced with significant and ongoing operational risk management challenges every day.

Consequently, compliance managers require a robust, regulatory risk management platform to support vendor management, business continuity planning, incident response, managing policies & procedures and emergency communications. The RemoteComply Suite of products can address these challenges by providing an enterprise-wide, web-based operational risk management solution.

All RemoteComply products integrate with each other which provides a single system that eliminates double data entry, increases efficiencies and allows organizations to comply with regulations. RemoteComply supports all devices including mobile, tablet, and desktop to ensure that your information can be accessed anywhere in any situation.

Remote VENDOR®

RemoteVendor® is a vendor management solution which manages vendor information including contacts, financial reports, contracts, audit reports, etc. Compliance managers can quickly perform a risk assessment and score vendors on multiple categories determining the overall risk for all vendors.

Remote INCIDENT®

RemoteIncident® is an incident response system which allows an organization to organize and manage the aftermath of ANY incident including an IT incident (data breach, virus attack), fraud incident, personal injury, etc.

Remote PLAN®

RemotePlan® is a business continuity planning solution which allows organizations to build a comprehensive business continuity plan, departmental business impact analysis (BIA), and support tabletop testing activities.

Remote POLICY®

RemotePolicy® is an enterprise wide document management system that allows organizations to centrally store, manage, and track revisions to policies and procedures.

Remote NOTIFY®

RemoteNotify® is a two-way emergency notification system which allows organizations to deliver, with a push of a button, urgent messages including emails, text messages or voice calls to employees or call groups so they are informed about critical bulletins.
